

BFM Travel Medicine

Going overseas? Whether Thailand or Nepal, Kenya or Peru; staying healthy requires you to be a smart traveller. A smart traveller invests in quality travel advice as they do in travel insurance.

You may require Yellow Fever vaccination by law to gain entry into certain countries. Apart from vaccines there are many other important medical issues to consider preventing such as Malaria, Dengue Fever, Rabies, diarrhoeal illness or even altitude sickness.

We offer travel medical advice from well travelled specialized Travel Medicine doctors, who stay updated by regularly attending conferences. We conveniently stock a comprehensive range of vaccines including Yellow Fever and travel medications.

Travel Medicine Alliance

BFM is associated with Australia's premier national organisation of independent travel medicine professionals known as the Travel Medicine Alliance (TMA). With over 30 clinic locations nationally, we have access to international travel health databases and other resources.

To provide you with the best service, we recommend that you make a 30 minute appointment so we can assess your itinerary and best advise you about the health issues appropriate for your particular trip.
